

THE ROTOPRONE™ THERAPY 24-HOUR PROMISE

Oxygenation Improvement Within 24 Hours

Every day you care for patients who are critically ill and suffer from pulmonary complications. As your partner in treating these patients, KCI understands the challenges you face and is proud to bring you the RotoProne™ Therapy 24-Hour Promise.

The RotoProne™ Therapy 24-Hour Promise is our commitment to share the financial burden with you in treating your patients with the RotoProne™ Therapy System.

KCI will not charge for the first day of therapy if the patient's PaO₂/FiO₂ does not show at least a 20% improvement after the first 24 hours of therapy.*

*See reverse side for details

THE ROTOPRONE™ THERAPY 24-HOUR PROMISE: 24-hour Oxygenation Improvement

The RotoProne™ Therapy 24-Hour Promise is subject to the following criteria:*

- PaO₂/FiO₂ >60 and <200 upon initial placement
- During the first 24 hours, patient must be in the prone position upon physician orders for a minimum of 18 of 24 hours
- Patients with a PaO₂/FiO₂ below 60 upon initial placement are not included
- Adherence to all device labeling, instructions for use, on-screen guides, inservice and training materials, and published clinical guidelines for the duration of placement

Case Study Summary: Sinai-Grace Hospital, Detroit Michigan

12 hours prior to initiation of the RotoProne™ Therapy System

Day 3 of RotoProne™ Therapy System

Day 6 of RotoProne™ Therapy System; RotoProne™ Therapy System discontinued and patient transferred to standard medical bed

Patient presented with a perforated appendix with a phlegmon for which surgical intervention was performed. Post-operatively, the patient was diagnosed with ARDS on Hospital Day 6 and a decision was made to prone the patient with the RotoProne™ Therapy System. In the experience of the treating clinician, the benefits of using the RotoProne™ Therapy System included improved oxygenation as well as effective resolution of the ARDS. After 6 days of RotoProne Therapy, blood gases were stable and the patient was transferred to a standard medical bed.

NOTE: As with any case study, the results and outcomes should not be interpreted as a guarantee or warranty of similar results. Individual results may vary depending on the patient's circumstances and condition. Results may not be typical.

For more information on the RotoProne™ Therapy System, please contact your KCI sales representative, call toll-free at 1-800-275-4524 or visit www.rotoprone.com.

*Additional Details:

Protocol must adhere to all published KCI product instructions for use, operation manuals, protocols, device labeling, and onscreen guides.

The RotoProne™ Therapy 24-Hour Promise is intended as a financial risk-sharing program relating specifically to the actual rental cost of the KCI product only. KCI makes no representation, guarantee, or warranty as to specific patient outcomes. The RotoProne™ Therapy 24-Hour Promise does not cover, and KCI hereby disclaims, any direct, indirect, incidental, or consequential damages other than the product rental fee.

Therapy and product indications, contraindications, warnings, and precautions must be adhered to. Individual results may vary. Product is subject to availability, facility contractual terms and conditions, and geographical limitations. Offer is subject to change without notice. See your local KCI representatives for further details.

The RotoProne™ Therapy System has specific indications, contraindications, safety information and instructions for use. Please consult product labeling and instructions for use prior to placement. Caution: Federal law restricts this device to sale/rental by or on the order of a physician.
